ART UNIT	PAPER NUMBER
----------	--------------

2151

DATE MAILED: 06/17/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/809,732	Applicant(s) RUDOLPH ET AL.	
	Examiner Backhean Tiv	Art Unit 2151	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Detailed Action

Claims 1-13 are pending in this Office Action.

Priority

Priority has been granted.

Information Disclosure Statement

The information disclosure statement filed 4/29/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 2151

1 Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior
2 to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3
4 Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by US
5 Patent 5,978,773 issued to Hudetz et al.(Hudetz).

6
7 As per claim 1, Hudetz teaches system for accessing a remote computer
8 network, comprising:
9 a package(col.3, lines25-26);
10 an identification tag coupled to said package that stores identifying data unique
11 to said package(col.3,lines25-26; the bar code is considered to be the
12 identification tag);
13 an interrogator located external to said package(Fig 1. element 44, Fig.2, col.3,
14 lines33-34);
15 a computer system coupled to said interrogator for exchanging information with a
16 remote site(Fig.1 and Fig.2);
17 wherein said interrogator transmits a query to said identification tag and said
18 identification tag responds by communicating said identifying data to said
19 computer system, thereby accessing said remote computer network(col.3,lines
20 24-36).

21 As per claim 2, the system of claim 1, wherein said identification tag is selected
22 from the group consisting of: a linear bar code, a composite bar code, a dimensional bar

1 code, a radio frequency identification transponder, and data recorded
2 magnetically(Fig.1, element 48, Fig.3).

3 As per claim 3, the system of claim 1, wherein said identifying data further
4 comprises data selected from the group consisting of: a product identifier, a serial
5 number, a URL or other reference to a web site, and combinations thereof(col.3,lines
6 24-26).

7 As per claim 7, Hudetz teaches method for providing product materials by
8 accessing a remote computer network, comprising the steps of:

9 (i) providing an integrated system comprising,

10 a package(col.3, lines25-26),

11 an identification tag coupled to said package that stores identifying data
12 unique to said package(col.3,lines25-26; the bar code is considered to be
13 the identification tag),

14 an interrogator located external to said package(Fig 1. element 44, Fig.2,
15 col.3, lines33-34), and

16 a computer system coupled to said interrogator for exchanging information
17 with a remote site(Fig.1 and Fig.2),

18 (ii) sending a query signal from said interrogator to said identification
19 tag(col.3,lines 32-33; by swiping the bar code reader across the product's UPC
20 symbol, it is inherent that a query signal is being sent);

21 (iii) responding to said query signal by communicating said identifying data from
22 said identification tag to said computer system(col.3, lines 33-36; by retrieving

1 the URL corresponding to the UPC product data, the examiner interprets this as
2 a response to the query signal);

3 (iv) executing a script associated with said identifying data in said computer
4 system, wherein said script contains programmed instructions(col.3, lines 33-36;
5 it is inherent that there is a script with program instructions associated with the
6 UPC product data because the URL is being retrieved);

7 (v) instructing said computer system to access said remote computer
8 network(Fig.8); and

9 (vi) sending said product materials from said remote computer network to said
10 computer system(col.8,lines 12-20).

11 As per claim 8, the method of claim 7, wherein said product materials is selected
12 from the group consisting of: product information, instruction manuals, advertising,
13 registration materials, promotional items, and mixtures thereof(col.6,lines 8-15).

14 As per claim 9, the method of claim 8, wherein said promotional items are
15 selected from the group consisting of: screen savers, fonts, computer games, text files,
16 music files, video files, and mixtures thereof(col.6,lines 8-15).

17 As per claim 10, the method of claim 7, wherein said product materials are
18 downloadable(col.8,lines 12-20; the HTML document is downloadable).

19 Claim 4 is of the same scope as claim 7, therefore is rejected based on the same
20 rationale(see claim 7 rejection).

21 Claims 5 and 11 are of the same scope as claim 2, therefore are rejected based
22 on the same rationale(see claim 2 rejection).

Art Unit: 2151

1 Claims 6 and 12 are of the same scope as claim 3, therefore are rejected based
2 on the same rationale (see claim 3 rejection).

3 ***Claim Rejections - 35 USC § 103***

4 The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
5 obviousness rejections set forth in this Office action:

6 (a) A patent may not be obtained though the invention is not identically disclosed or described as set
7 forth in section 102 of this title, if the differences between the subject matter sought to be patented and
8 the prior art are such that the subject matter as a whole would have been obvious at the time the
9 invention was made to a person having ordinary skill in the art to which said subject matter pertains.
10 Patentability shall not be negated by the manner in which the invention was made.

11
12
13 Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over US
14 Patent 5,978,773 issued to Hudetz et al.(Hudetz) in view of US Patent 6,081,508 issued
15 to West et al(West).

16
17 Hudetz teaches all the limitations of claim 7, however does not teach as per
18 claim 13, the method of claim 7, wherein a cookie is used to communicate between said
19 remote computer.

20 West teaches wherein a cookie is used to communicate between said remote
21 computer(col.29, lines48-50).

22 Therefore it would have been obvious at the time of invention to modify the
23 method of Hudetz to include wherein a cookie is used to communicate between said
24 remote computer as taught by West in order to provide software to establish
25 communication path to a computing resource(col.2,lines 39-42).

26

2

Conclusion

3

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5

US Patent 5,857,175 issued to Day et al., Fig.1, col.1, lines 25-67

6

7

8

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Backhean Tiv whose telephone number is (703) 305-8879. The examiner can normally be reached on 9 A.M.-12 P.M. and 1 -6 P.M.

10

Monday-Friday.

11

12

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenton B Burgess can be reached on (703) 305-4792. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
